

ECLIPSE NEWS 2

By Bill Meridian
November 19, 2010

Eclipse Note 1: The December lunar eclipse is already having an effect. According to Charles Jayne, the effect of a lunar eclipse lasts for about 6 weeks on either side of the eclipse. The effect should have begun near November 9th.

On cue, Prince William announced his marriage on the 17th. The eclipse is on his 0 Cancer Sun. Eclipses on the Sun can make one more prominent. And let us recall that he was born on a solar eclipse.

Eclipse Note 2: Congressman Charles Rangel (June 11, 1930) was convicted of ethics violations within a day of the Prince William announcement. Looking at his natal chart, we only see that the eclipse is square the Uranian planet Poseidon, which does have a connection to ethics.

Charles Jayne taught that eclipse conjunctions and oppositions to the Sun were the most powerful. The next most powerful were hits to the progressed Sun and the converse progressed (CP) Sun. His CP Sun is at 1 Aries, squared by the eclipse with an orb of about a degree.
